

Handy Nursery Plant List

Common Name	Variegated Tulip Tree
Botanical Name	Liriodendron tulipifera ' Aureomarginatum'
Image	NULL
Form and Flower	A heavily branched tree with dominant central leader. It rapidly makes a full size dense shade tree of oval to rounded outline. On older plants, the tulip shaped blooms are displayed on the outer branches in mid spring, with the leaves. The color is light green with a yellow-orange base and numerous rich yellow internal anthers.
Foliage and Fruit	The unique tulip-shaped leaves are accentuated by a wide band of bright yellow along the leaf edge surrounding the dark green center. . Fall color is a muted golden yellow.
Size	Height 40 to 50' Width 30 to 35'
Zone	4 to 9
Special Notes	If the preference is to seek out a tough tree with dense shade and to do so in a hurry, this is a top contender .
